PROFESSIONAL PROFILE

Junior web developer specializing in frontend development and experienced with WordPress. I excel at creating accessible, functional, and responsive web interfaces, applying user-centered UX/UI methodologies. I have hands-on experience in agencies and native code development. Furthermore, my previous background in social work has equipped me with advanced communication and conflict resolution skills, enabling me to calm, guide, and provide excellent support to clients under pressure or in demanding situations.

PROFESSIONAL EXPERIENCE

WordPress Web Developer (Internship) | *WeJustDesign (Agency)* | April 2026 - June 2026

- Management and technical maintenance of corporate websites in production, ensuring their stability and minimum loading times.
- Advanced layout and responsive design adjustments using the Elementor page builder.
- On-page technical SEO optimization and structural indexing of dynamic content and e-commerce catalogs using tools such as Yoast SEO, WooCommerce and Amelia.

Web Developer | *Casa de las Mujeres Vallekas* | 2026

- I developed the association's official website from scratch using native code (HTML5, CSS3, JavaScript), achieving a structured digital presence.
- I participated in assemblies to listen to the real needs of the users, which allowed me to design an accessible interface adapted to women with basic digital skills and solve the specific needs of their association.
- I developed and delivered specific training so that the users of the entity could learn to manage the website and publish on the blog completely autonomously.

Operational Incident Management | *Security Direct* | 2025

- I provided top-level operational and technical support, identifying customer needs and managing the complete incident cycle through ticketing systems.

ICT Teacher | *Casa de las Mujeres Vallekas* | 2021 - 2023

- I designed and delivered ongoing digital literacy classes tailored to women of various ages.
- I trained students in user-level technological skills, reducing their digital divide and providing guided technical support for their personal tasks.

Specialist in Social Intervention | *Cruz Roja* / *Colisée Residence* / *Others* | 2019 - 2025

- Comprehensive management of complex cases and monitoring of individual social action plans. Direct handling and mediation in highly frustrating situations, developing interpersonal skills for conflict resolution, empathy, and resilience under stress.

Primary and Secondary School Teacher | *Different Educational Centers* | 2018 - 2023

- Planning of curricula and agile management of diverse classrooms (including students with functional diversity and young people in situations of social vulnerability).

REAL PROJECTS

Web platform - Casa de las mujeres Vallekas | www.casadelasmujeresvallekas.es

Design, layout, and complete implementation from scratch of the official website platform using native code (HTML5, CSS3, JavaScript). The main challenge was to mitigate the digital divide for older users (the primary target audience), which was resolved through accessibility analysis and collaborative processes in meetings with the association. The site has outstanding scores for web performance and accessibility, verified by Google Lighthouse, and is currently 100% self-managed by the organization.

Web platform - Mima tu cuerpo | mimatucuerpo.pages.dev/

Design and development of an informative static website using native code (HTML5, CSS3). The information architecture was structured into multiple sections to detail the coaching services. I opted for a minimalist UI/UX approach (Content-First) without complex dependencies, ensuring fast loading speeds, zero technical maintenance, and direct client acquisition.

Specialized Web Platform - Tesela Psychology Clinic | *WeJustDesign Agency*

Website development and layout using Elementor, focused on the mental health sector. Information architecture design and application of a UX/UI approach aimed at conveying calm, trust, and security.

Comprehensive Academic Portal - English Academy | *WeJustDesign Agency*

Development and structuring of a corporate website for the education sector using Elementor. Implementation of a clean user interface (UI) and intuitive navigation for displaying B2B (Business to Business) and B2C (Business to Consumer) services.

ACADEMIC BACKGROUND

- **Advanced Technician in Web Application Development (DAW)** - IES José Martínez / EPSUM | 2024 - 2026
- **Master's Degree in Gender Equality** - SIAC-Higher Institute of Intervention and Social Action | 2023
- **Higher Technician in Social Integration** - IES Renacimiento | 2019 - 2021
- **University Degree in Primary Education (Specialization in PT)** - ESCUNI | 2014 - 2018

TECHNICAL STACK AND INTERPERSONAL SKILLS

Technologies and Tools (Hard Skills):

- **Frontend Development:** HTML5, CSS3, JavaScript
- **WordPress Ecosystem:** Maintenance and Development, Visual Builders (Elementor, Layout)
- **E-commerce:** WooCommerce, Amelia
- **Databases & SEO:** MySQL, CRM, Yoast SEO
- **Work Ecosystem & Quality:** Git, GitHub, Google Lighthouse, Responsive Design
- **Creative Design:** Canva

Human Engineering & Soft Skills:

- **Empathy and UX focus:** User behavior analysis for interface optimization.
- **Technological translation:** Expert ability to explain development logic to non-technical profiles.
- **High accessibility:** Active reduction of technological barriers and the digital divide.
- **Conflict resolution:** Agile management of critical incidents.
